CLASSVOICE

Your Mirror for Meaningful Dialogue

LearningWorks

Want to hear what your classroom conversation really sounds like?

Try **Record** in ClassVoice.

Private to you. Your recordings and reports are only for your eyes. No one else can see them or access them.

HOW IT WORKS

Three steps from lesson to insight

1

Record

Record in ClassVoice or upload an audio file. Up to 60 minutes.

2

Analyze

ClassVoice transcribes the lesson and analyzes the dialogue.

3

Explore

Read your private report and choose a next move.

STEP 3 · RECORD OR UPLOAD

Record your lesson, two ways

Record in ClassVoice

Open Record, press start, and teach. The analysis begins when you stop.

Upload an audio file

Record on a phone or other device, then upload the audio file.

Either way, 60 minutes is the maximum.

Your recording is private. No one else has access to it.

Only for your eyes

Not shared. Your recordings stay with you.

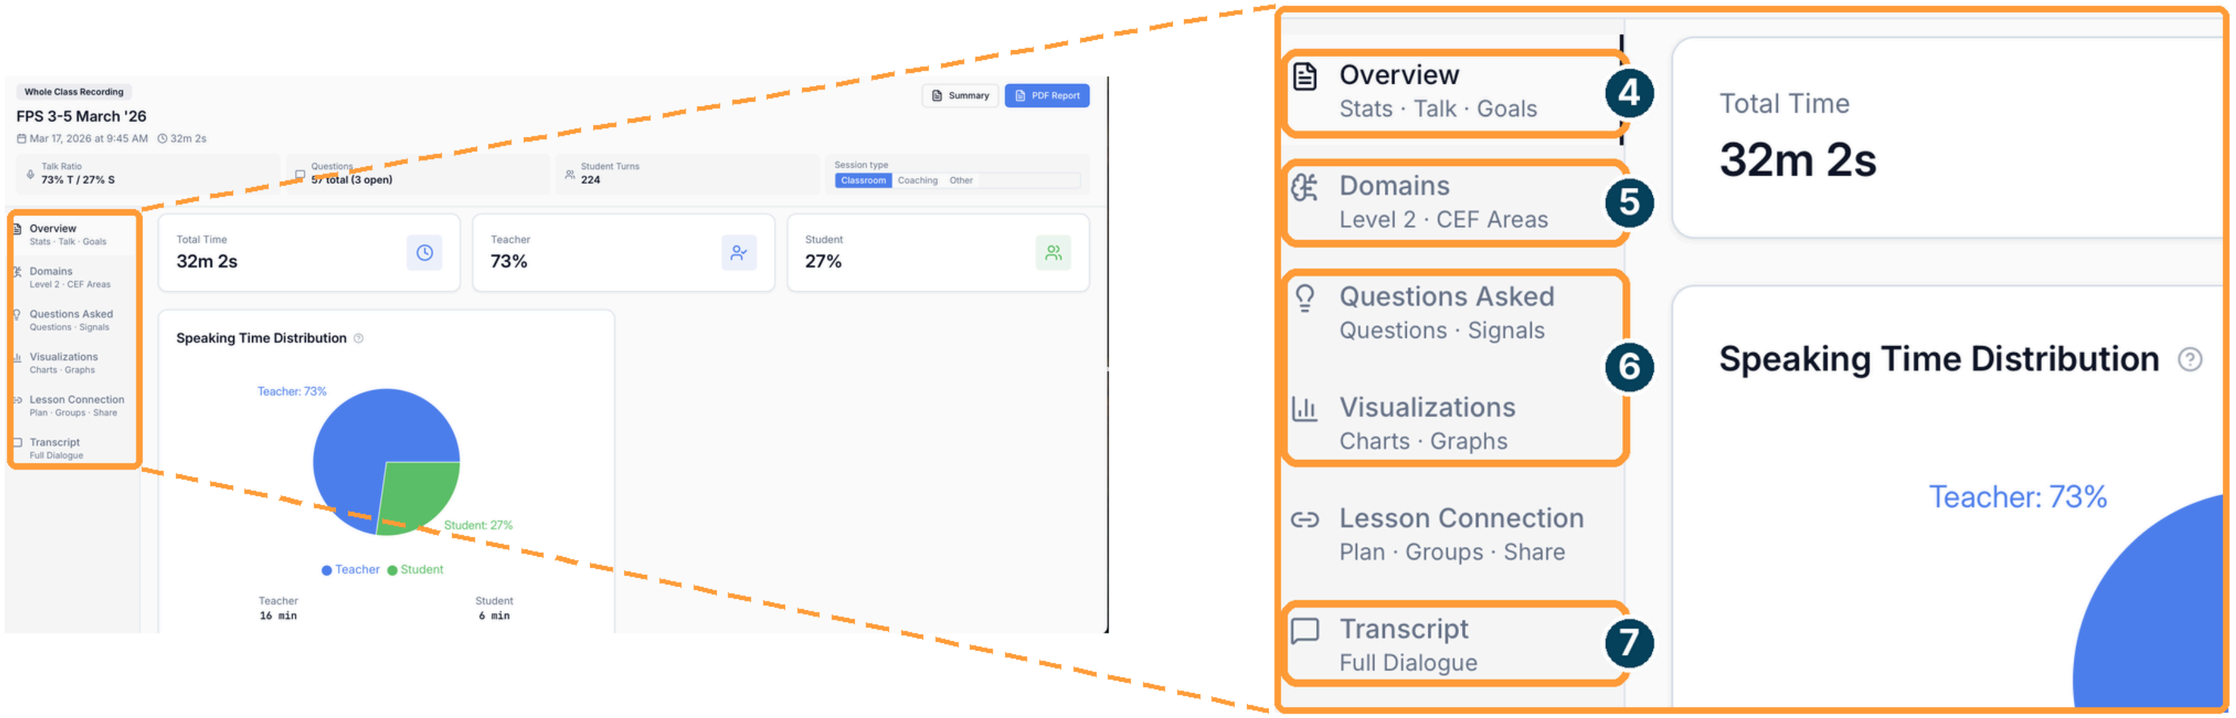

No one else has access. Not colleagues, not administrators.

No one else can see it. Reports and transcripts are yours alone.

Private information. A safe space to reflect and grow.

FIND YOUR WAY AROUND

Use the report menu

STEP 4 · OVERVIEW

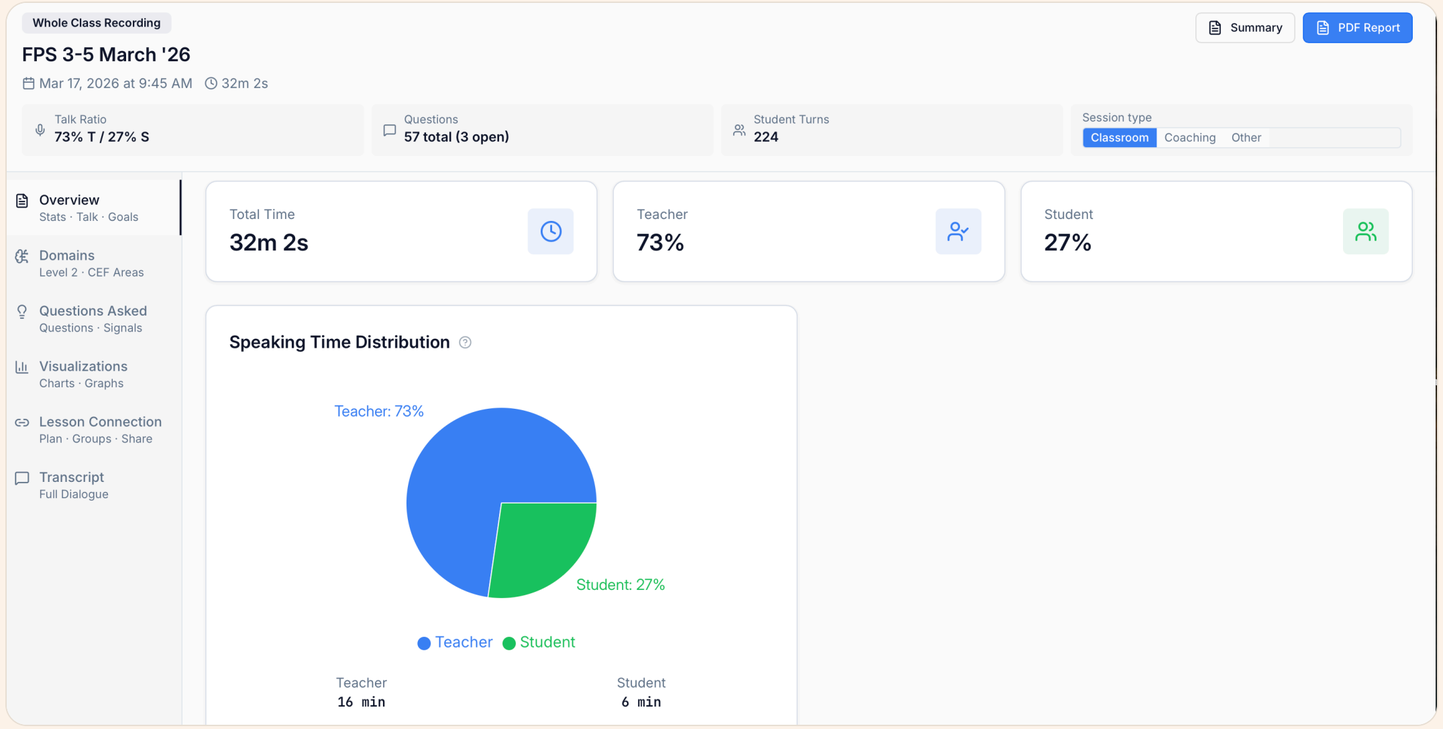

See who carried the talk

Talk Ratio
Teacher vs. student talk

Questions
Total asked, and how many open

Student Turns
How often students spoke

Speaking Time
Total time, split by teacher and students

STEP 5 · DOMAINS · START HERE

Link your Pre-Check, then read your QDI

Link a Pre-Check

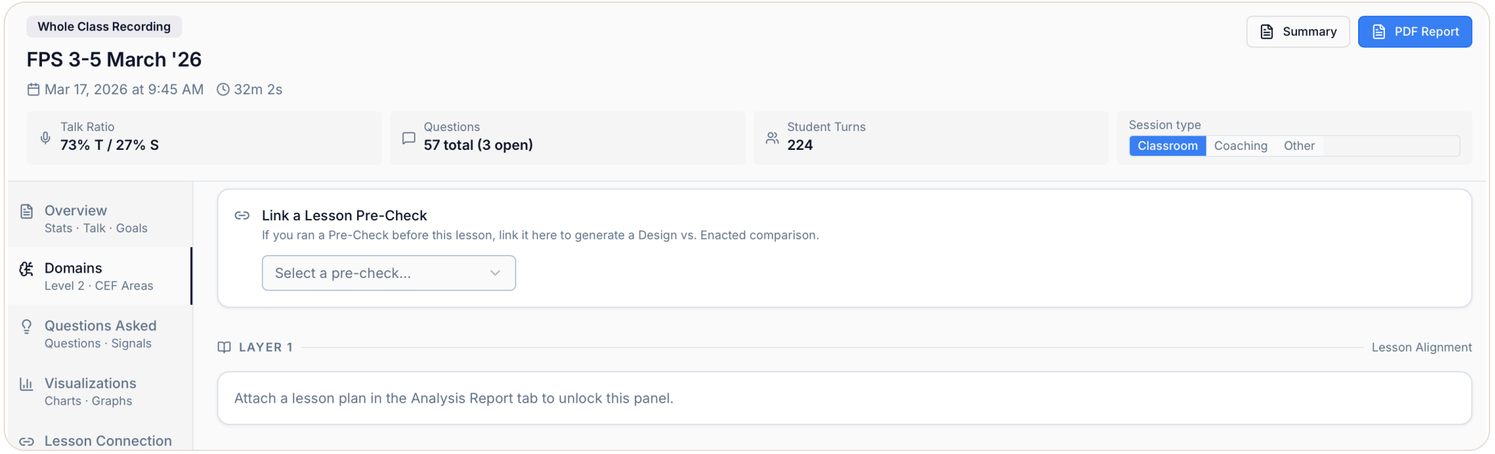

Compare what you planned with what happened.

Attach a lesson plan

Unlock Lesson Alignment.

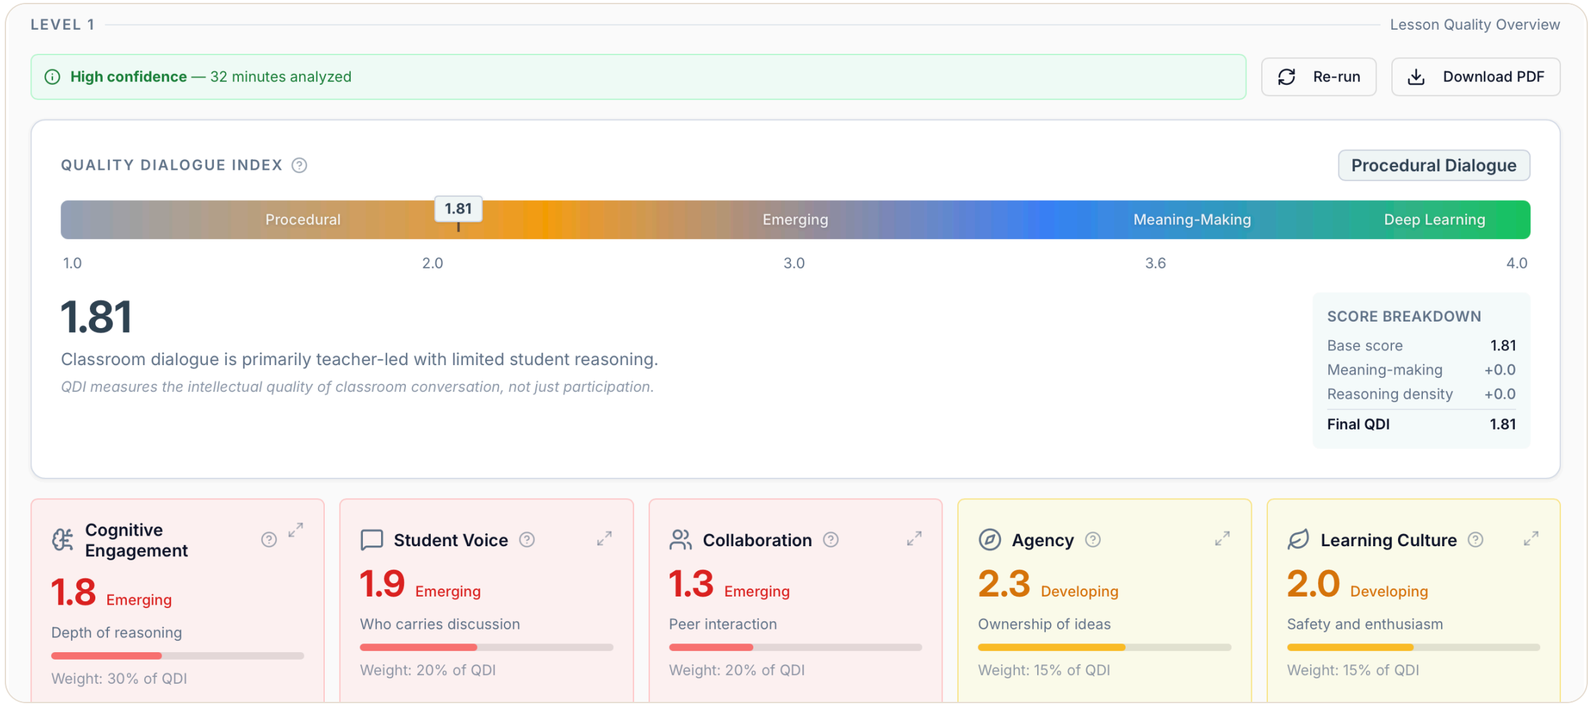

Scroll down

Your Quality Dialogue Index comes next, in three levels.

STEP 5 · DOMAINS · QDI LEVEL 1 OF 3

One score, five domains

QDI scores the quality of talk from 1.0 to 4.0: Procedural, Emerging, Meaning-Making, Deep Learning.

Five domains feed it: Cognitive Engagement, Student Voice, Collaboration, Agency, Learning Culture.

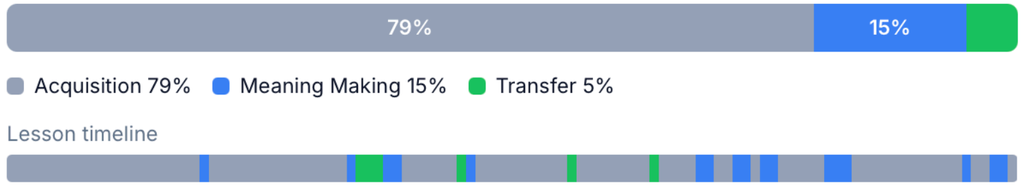

STEP 5 · DOMAINS · QDI LEVEL 2 OF 3

Learning dynamics: the patterns underneath

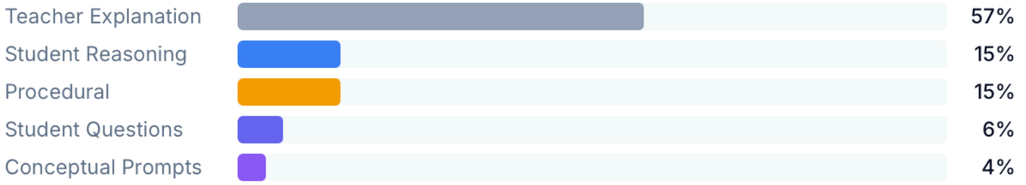

LEVEL 2 — Learning Dynamics Analysis

Click any panel for a detailed breakdown.

Learning Phase Timeline (AMT)

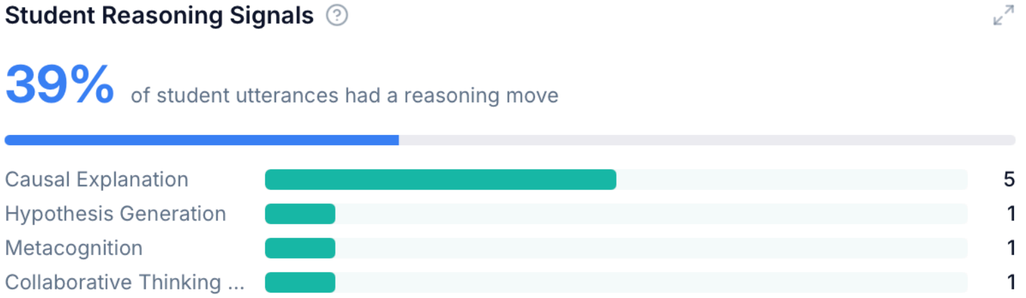

Dialogue Composition

Participation Map

Student Reasoning Signals

STEP 5 · DOMAINS · QDI LEVEL 3 OF 3

Evidence and a next move

LEVEL 3 — Evidence & Instructional Moves

WHAT'S WORKING

Multiple students offered reasons for their ideas and reflected on their process. For example, Student 1 explained, “because the questions seem very limiting...” (10.1), Student 5 hypothesized, “It might be more meaningful if they can cluster the data...” (12.0), and Student 4 reflected on their facilitation thinking (21.1) while also building on a peer’s idea “in the way that you said” (24.9).

GROWTH OPPORTUNITY

Few student comments referenced concrete evidence or patterns from the task; only 7 of 18 student turns included a reasoning signal and none cited specific data (e.g., 11.4–11.7, 14.5, 23.1). Strengthen prompts that press for evidence use and pattern noticing tied to the actual data or artifacts.

SUGGESTED NEXT MOVE

Implement a 2-minute Claim–Evidence–Reasoning share: have students first write one sentence that names a claim and cites at least one precise data point or feature (e.g., “I notice the most frequent rainfall is 1/2 inch because there are 5 Xs at 1/2”), then cold-call two students to read theirs, prompting “What makes you say that?” for the reasoning.

What is working: strengths, with student quotes

Growth opportunity: the area to strengthen

Suggested next move: one strategy to try

STEP 6 · QUESTIONS ASKED

Every question, sorted by AMT level

37

Level 1: Acquisition

Recall and literal comprehension

17

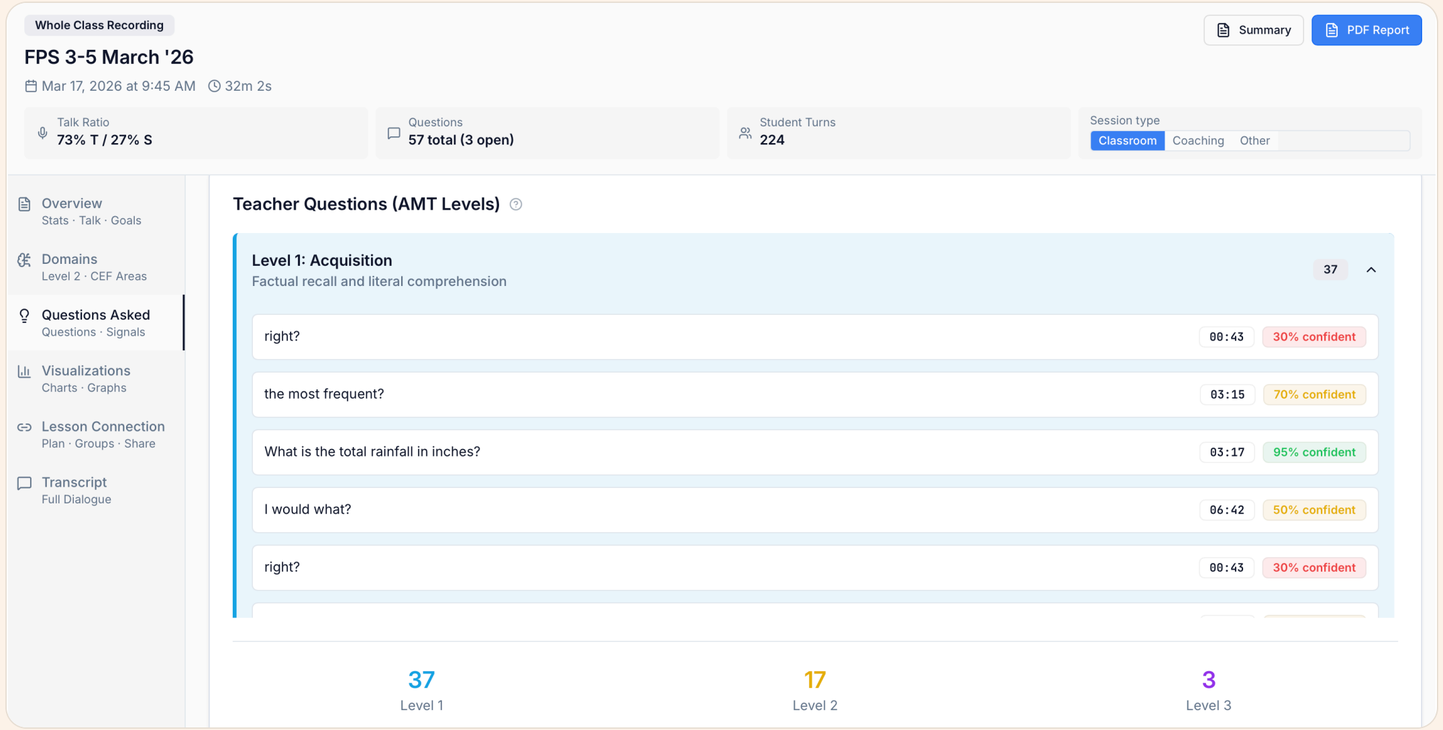

Level 2: Meaning Making

Explaining and connecting

3

Level 3: Transfer

Applying in new situations

STEP 6 · VISUALIZATIONS

See the conversation flow

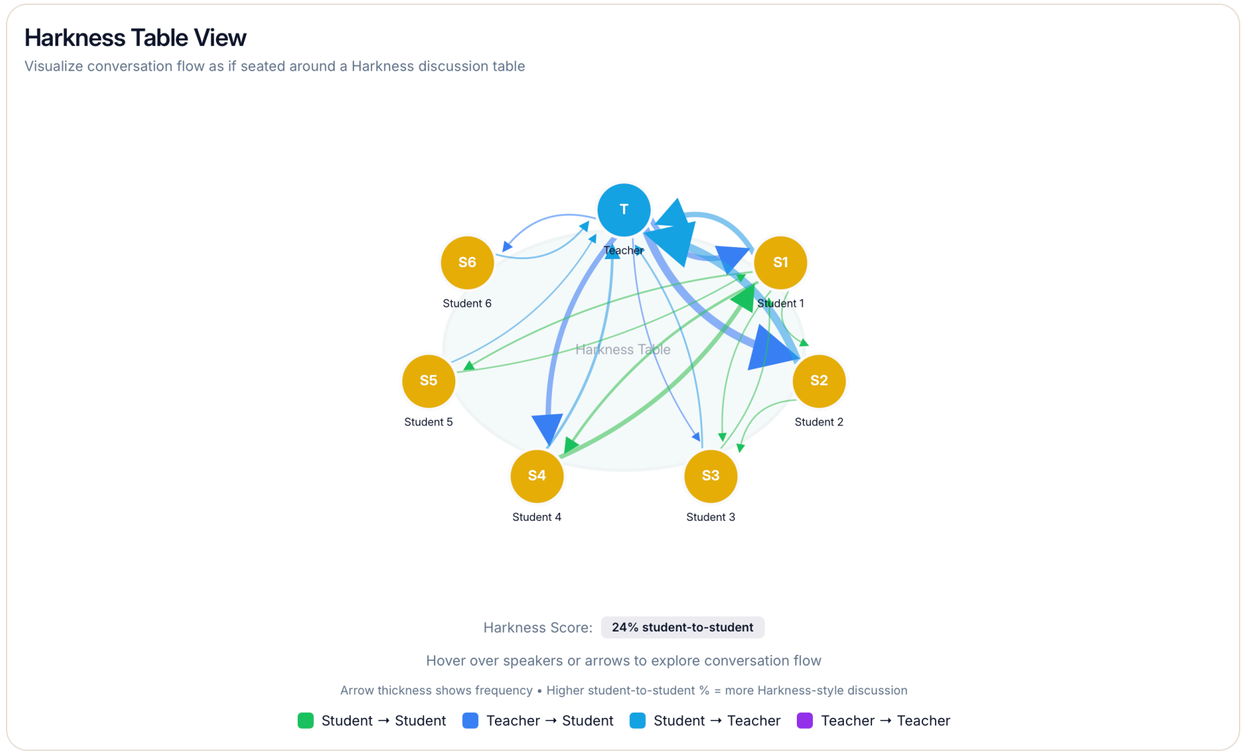

The Harkness Table View seats everyone around a table. Arrows show who spoke after whom; thicker arrows mean more exchanges.

Harkness Score

24%

of exchanges were student to student

The goal: more students talking to students, not everything going through the teacher.

STEP 7 · TRANSCRIPT

Read the full dialogue

Every word, labeled

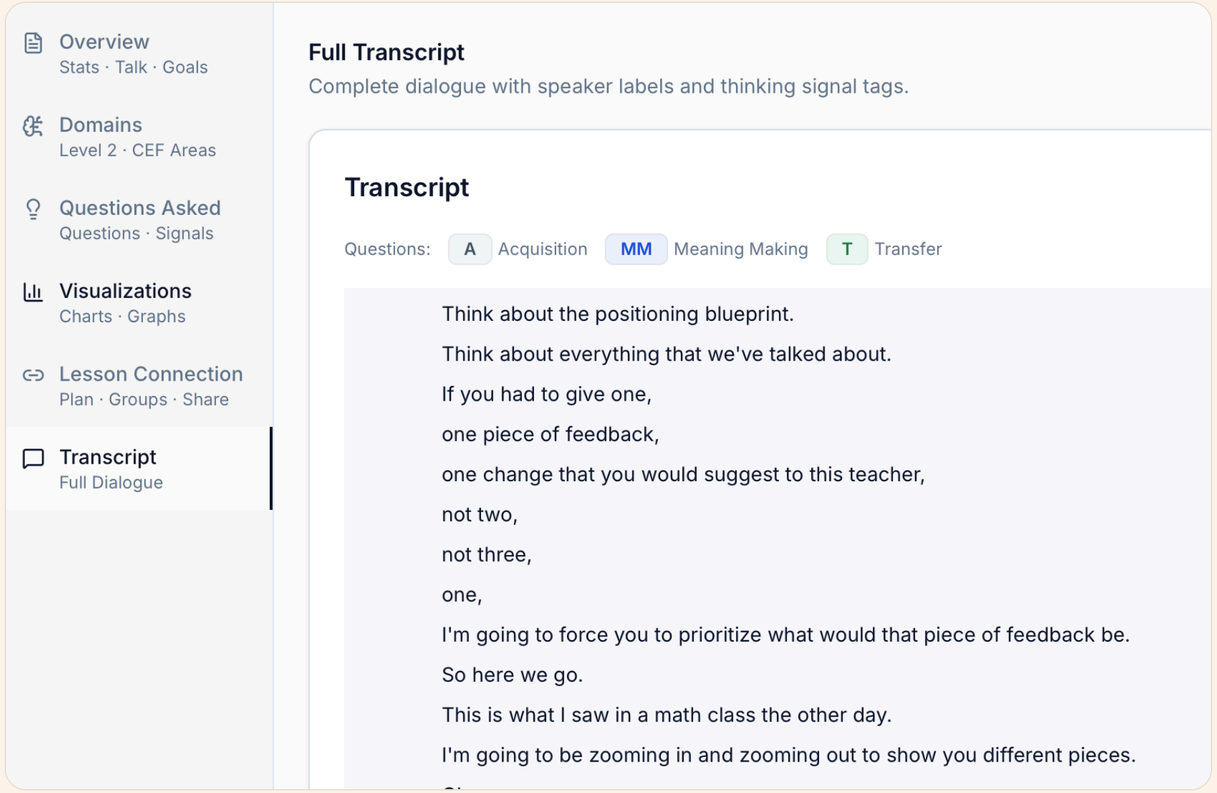

The complete lesson, with speaker labels and thinking signal tags.

Questions tagged by level

A Acquisition, **MM** Meaning Making, **T** Transfer.

Find the moment

Use timestamps from your report to jump to what happened.

NOT ONLY FOR TEACHERS

Coaches and principals can use Record too

Instructional coaches

Record your coaching conversations with teachers and get feedback on how well you coach.

Principals and leaders

Record feedback conversations with teachers and get feedback on your own coaching.

Always ask first. Record only when the teacher gives you permission to audio record the conversation. Choose **Coaching** as the session type.

YOUR TURN

From recording to next move

1. Record or upload (60 minutes maximum)
2. Read the header numbers and Overview
3. Review the QDI and five domains
4. Choose one Suggested Next Move
5. Check the balance of question levels
6. Look at the Harkness Score
7. Link your Pre-Check or lesson plan
8. Download the PDF for your own records

Everything in Record is private. Only you can see it. No one else has access.
